

Microsoft Certified IT Professional

COMPUTER TRAINING

The key to a better future

New Generation of Certification

The new generation of Microsoft certifications is more specific and targeted to reflect the detail of what you do and to prove your expertise to those who need to know.

Consisting of three series (Technology, Professional and Architect) and four credentials, the new generation of Microsoft certifications provides a simpler and more targeted framework for IT managers to validate core technical skills, professional skills, and architectural skills. It also provides professionals in the IT industry with a more relevant, flexible, and cost-effective way to showcase their skills.

SAVE UP TO 50%

The Microsoft Certified IT Professional (MCITP) credential lets you highlight your specific area of expertise. MCITP certifications include:

- IT Professional: Business Intelligence Developer
- IT Professional: Database Developer
- IT Professional: Database Administrator
- IT Professional: Consumer Support Technician
- IT Professional: Enterprise Messaging Administrator
- IT Professional: Enterprise Project Management with Microsoft Office Project Server 2007
- IT Professional: Server Administrator

A comprehensive list of all the MCITP certifications is available on our website.

Benefits for the Employer

Professional Series credentials validate a comprehensive set of skills required to be successful on the job. These skills include design, project management, operations management, and planning, and they are contextual to the job role. By validating a more comprehensive set of skills, these credentials give candidates and their hiring managers a reliable indicator of on-the-job performance.

The demand for IT certification has increased dramatically, with businesses in the top 20% of all organisations having 40% -55% of their team members certified.

Benefits for the IT Professional

The Microsoft Certified IT Professional (MCITP) credential provides IT professionals with a simpler and more targeted framework to showcase their technical skills in addition to the skills required for specific developer job roles.

Certified employees have greater credibility and are valued as a resource both internally and externally. In a recent survey, 57% of MCPs expected to receive a pay bonus that year, and 40% of workers reported that Microsoft certification helped them either find a job or led to a promotion.

To Become a MCITP You Need to Pass Certain Examinations

Microsoft Certified IT Professional: Business Intelligence Developer 2008 certification demonstrates that you can design, create, deploy, and maintain business intelligence solutions by using SQL Server 2008.

An upgrade option from MCITP: Business Intelligence Developer is available for this certification.

Microsoft Certified IT Professional: Business Intelligence Developer certification demonstrates that you can design solutions, data transformations, and reports.

Microsoft Certified IT Professional: Database Developer 2008 credential demonstrates that you can design, create, deploy, and maintain database solutions by using SQL Server 2008.

An upgrade option from MCITP: Database Developer is available for this certification.

Microsoft Certified IT Professional: Database Developer credential demonstrates that you can design a secure, stable, enterprise database solution by using Microsoft SQL Server 2005.

Microsoft Certified IT Professional: Database Administrator 2008 certification demonstrates that you can design, deploy, optimise, and maintain SQL Server 2008.

An upgrade option from MCITP: Database Administrator is available for this certification.

Microsoft Certified IT Professional: Database Administrator certification demonstrates that you can keep up with your enterprise business solutions 24 hours a day, 7 days a week.

An upgrade option from MCDBA on SQL Server 2000 is available for this certification.

Microsoft Certified IT Professional: Consumer Support Technician credential validates your expertise in a role supporting a broad range of consumer desktop operating systems, desktop applications, mobile devices, networking, and hardware support issues related to the Windows Vista operating system.

Microsoft Certified IT Professional: Enterprise Messaging Administrator credential demonstrates your ability to design and deploy messaging solutions with Microsoft Exchange Server 2007.

Microsoft Certified IT Professional: Enterprise Project Management with Microsoft Office Project Server 2007 credential demonstrates that you can manage and support projects in an enterprise project management (EPM) environment.

Microsoft Certified IT Professional: Server Administrator credential is the leading certification for Windows Server 2008, providing widely recognised, objective validation of your leadership and problem-solving skills in working with Windows Server 2008.

Upgrade options from MCSA on Windows 2003 and MCSE on Windows 2003 are available for this certification.

F1 Computing Can Help

F1 Computing is one of the leading training companies in its field and uses this expertise to ensure that its training clients have both the theoretical knowledge supplied by Microsoft curriculum and the practical knowledge that an experienced training company can give.

Until 31st December 2009, in addition to the discount on the cost of courses, F1 will provide all students on a MCITP Certification Route with FREE Transcender practice tests for the exams on the route, where available.

YOU PAY	£3,025	£3,320	£3,020	£3,375	£3,020	£3,550	£2,300	£2,820	£2,775	£3,100

* SQL Server 2008 MCITP courses are still in development with Microsoft. However, the relevant MCTS certification will be a pre-requisite to the MCITP, so it would be worthwhile starting with this certification.

- Routes include all bought-in Microsoft Official Curriculum manuals, Transcender practice tests, exams, refreshments and lunches, ongoing support from qualified MCT and free re-sits on any courses you have attended.
- To get more information about how to prepare for each exam, please visit the Microsoft web site <http://www.microsoft.com/learning/mcpexams/prepare/findexam.asp>.

Please call 0800 169 1890 if you wish to discuss these options with a qualified MCT trainer.
